POWERING THE EUROPEAN GREEN DEAL

An industrial strategy for PV

Naomi Chevillard
Policy Advisor, SolarPower Europe

EUFORES Inter-Parliamentary Meeting
Helsinki, 22nd November 2019
Becoming the world’s first climate-neutral continent is the greatest challenge and opportunity of our times. It involves taking decisive action now.

I will propose a European Green Deal in my first 100 days

Ursula von der Leyen
EU Commission President-elect
WHAT DOES IT TAKE TO GET THERE?
Solar PV supply should increase from 29% in 2030 to about 62% in 2050
A just and fair transition for Europeans

- Support the competitiveness of EU businesses and address the transition of heavy industries in Europe
- Deliver on the jobs of tomorrow.
- Deliver valuable growth activities in economically restructuring territories such as former coal regions
A European **industrial leadership** in clean energy technologies

- Strong **Research & development ecosystem** is essential to maintain industrial leadership at global level

- **40% of patents** for renewable energy originated in Europe

---

**Cells**

**Solar skins**

**Floating solar**
"We can only succeed if we are the ones creating, developing and producing new technologies"

Franco-german manifesto for a European industrial Policy fit for the 21st century, 19 February 2019
The European Commission (DG GROW) is developing massive technology & industrial uptake programs for European « Strategic Value chains »

Strategic forum for European Common Interest

Hydrogen   Low Carbon Industry   Batteries   IoT

Mainstreaming renewables across all SVC’s

Solar?
